Drone Test and Development Centre - Training Academy

Our DTDC Training Academy is the ideal venue to host training sessions with on-site flight areas, classrooms, meeting rooms and break areas. Host classes using a suite of digital presentation tools in our classroom and meeting spaces, then take your students to one of our flight areas for hands-on experience. Our large, open flight spaces can suit a variety of training situations and ability levels depending on the specific course you are running. A sensor test range is available to support the simulation of a natural environment for testing.

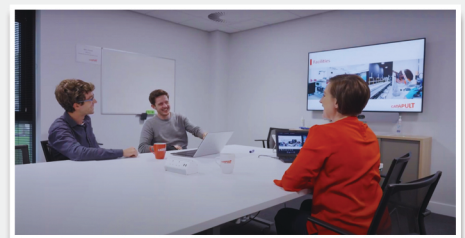

At your disposal:

- Runway and vertical launchpads with approximately 105,000m² flight area
- 10x10x10m drone cage
- Drone tethers fitted with forcemeters
- Classrooms fitted with AV capabilities
- Meeting rooms for smaller groups
- Drone workshop

If you are a drone RAE looking for a training venue then get in touch to find out how we can support you.

“ Whether you are a start-up, SME, or prime in the UK space industry, we have the expertise, experience, and technology to help you bring your ideas to life quickly and efficiently. Contact us to learn more about how we can support you in prototyping and development. ”
